

# RECOMMENDED CHANGE ON ANY PRE-2007 VEHICLE WITH A PENNTEX ALTERNATOR

 **OLD SIX-FOOT-LONG BLACK REGULATOR GROUND CONNECTION ON OR NEAR THE ALTERNATOR. REMOVE THIS CONNECTION AND CUT THE WIRE.**

In 2007 the Regulator ground wire was shortened from 72 inches to 18 inches. We recommend shortening the Regulator ground wire on all 2007 & earlier vehicles that have not been modified already. This can improve Regulator performance. Any new PennTex harness comes with the Ground wire already shortened to 18 inches.

If you have any questions, please contact our technical department at 877-590-7366 or by email at [tech@penntexusa.com](mailto:tech@penntexusa.com). Thank you for using PennTex products.
