

14-Volt Charging System Testing and Warranty Information

With the addition of the 14-Volt PennTex PX-7000 Voltage Regulator for some 2009-up Ford vehicles, there are now two different sets of Testing and Warranty paperwork. *The tests are not interchangeable.*

If your regulator is part of a 14-volt system and has a 4-wire connector with a ground wire connection below that, it will look like the regulator on the right. Models PX-4000, PX-5000, or PX-6000 use the PennTex paperwork below:

Connector for PX-4000, PX-5000, & PX-6000 Regulator

Some PennTex Charging Systems for 2009 & up Fords require a special PX-7000 Voltage Regulator that works on those models only.

[Click Here](#) for PennTex Warranty and Testing paperwork if you have a 2009 & up Ford vehicle with a PX-2, PX-5, or PX-7 Series alternator using a PX-7000 Voltage Regulator with a single 8-pin connector like the one on the right.

[Click Here](#) for a PX-7000 Voltage Regulator Full-Field Test with Photos.

[Click Here](#) for Information on which vehicles and which Penntex Charging Systems use the PX-7000 Voltage Regulator. The PX-7000 also uses a specific Charging System Harness to connect the PennTex system to the vehicle. Harnesses for the PX-4000, PX-5000, and PX-6000 won't work on a PX-7000.
